Stunning Photography

The Compendium features over 1,000 stunning photographs that capture the beauty and diversity of the PCT. From the snow-capped peaks of the

Sierra Nevada to the lush forests of Oregon and Washington, the photographs in the Compendium will inspire you to lace up your boots and hit the trail.

Detailed Maps

In addition to the stunning photography, the Compendium also includes detailed maps of the entire PCT. These maps are essential for planning your hike and navigating the trail, and they include information on mileage, elevation gain, and water sources.

- Pack light: The PCT is a long hike, so it's important to pack as light as possible. Only bring the essentials, and consider sending resupply boxes to yourself along the way.
- Be prepared for all types of weather: The PCT passes through a variety of climates, so it's important to be prepared for all types of weather. Bring rain gear, sunscreen, and insect repellent, and be sure to check the weather forecast before you head out.
- Hike your own hike: The PCT is a challenging hike, but it's important to hike your own hike. Don't try to keep up with other hikers, and take breaks when you need them.
